Description

This stunning 1995 Mercedes-Benz E320 Wagon (S124 chassis) is a true classic from the legendary W124 series, known for its bulletproof reliability, timeless design, and versatile family-hauler capabilities. Originally from New York, USA, this example was imported to Switzerland and has been meticulously maintained. It passed its MFK inspection in November 2025 with flying colors, ensuring it's fully compliant and ready for Swiss roads. With only 119,000 miles on the odometer, it's a low-mileage gem that drives smoothly and feels solid – a testament to Mercedes' over-engineered quality.

Weitere Details

Finished in elegant Tourmaline Green Metallic with body-color lower cladding, the exterior presents beautifully, complemented by features like a sunroof, fog lights, power antenna, roof rack, rear window wiper, headlight wipers, and the iconic mono-blade windshield wiper. The 15" Alamac alloy wheels are fitted with quality 195/65 Continental tires, adding to its poised stance. Minor scratches and paint chips are present (as expected for a 30-year-old vehicle), but the body is straight with no major issues.

Inside, the beige leather upholstery on the seats, door panels, and console creates a warm, luxurious cabin, accented by genuine wood trim. Comfort abounds with heated power-adjustable front seats (including driver memory), automatic climate control, power-adjustable steering column, driver and passenger airbag, cruise control, cassette stereo, and even a period-correct car phone (removed but included on sale). The versatile cargo area features the optional rear-facing bench seat that stows flat into the floor. The four-spoke leather-wrapped steering wheel frames clear VDO gauges, including a 160-mph speedometer, 7k-rpm tachometer, analog clock, and essential monitors for temperature, oil, and fuel.

Under the hood, the renowned 3.2-liter M104 inline-six engine delivers smooth, refined power through a responsive four-speed automatic transmission. The factory hydropneumatic self-leveling rear suspension ensures excellent handling, even when loaded. Recent maintenance includes an oil change, brake pads and rotors replacement, preparing it for immediate enjoyment.

This E320 Wagon has remained in careful ownership, with a clean history primarily in New York until its Swiss import. It comes with factory literature and service booklet for full transparency. Ideal for enthusiasts seeking a practical yet collectible Mercedes – perfect for daily drives, family trips, or weekend classics events. Imported from the US but seamlessly adapted for Europe, it's registered in Zurich and ready for a new owner.
